

212 Slim Tractor

The world's most powerful slim diameter tractor
Reliably reach target depth through the most restrictive completions

- Convey coiled tubing deeper into long horizontal laterals, ensuring complete intervention coverage.
- Backed by a 20-year proven track record with global deployments across unconventional, offshore, and multi-lateral wells.
- Supported by specialized field service and engineering teams for seamless planning and execution.
- Ideal for acidizing, scale milling, and debris cleanout applications, delivering reliable performance in demanding environments.

Outside Diameter	2.125 in
Inside Diameter	0.305 in
Pull Capacity	3,200 lbs
Length	14 ft
Wellbore Operational Range	4 – 8.2 in cased and open hole
Maximum Overpull	12,000 lbs
Maximum Temperature	392 F
Connection	1-1/2 AMMT
Materials of Construction	Steel, Inconel and Beryllium Copper
